| 23 <sup>rd</sup> June | Best Presentations of the Year                     | TBC                                | Dr Pat Barry       |
|                       |  |                                    |                    |

- Each presentation should consist of a 15 minute case presentation by a BST trainee followed by a discussion on a particular area of the case highlighted above.
- A slide set is available from the RCPI to support the presentations highlighted in red and ideally key areas identified in the slide sets should be covered
- The discussion should ideally be delivered by a Consultant or Registrar
- The best presentation each year is awarded the Professor Denis O'Sullivan medal
- This teaching will be available by teleconferencing to peripheral hospitals
